## EDUCATION

### Patna University

*Master of Computer Applications*

2022 – 2024

*CGPA: 9.02/10*

### Patna Women's College

*Bachelor of Computer Applications*

2017 – 2020

*Percentage: 80%*

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), Java, HTML/CSS, SQL

**Frameworks:** React, Redux Toolkit, Node.js, Express.js, Tailwind CSS

**Developer Tools:** Git, GitHub, Postman, VS Code, Vercel, Redux DevTools

**Database & Authentication:** MySQL, Firebase Authentication

**Concepts:** REST API Integration, Responsive UI, Component-Based Architecture, State Management, Authentication

## PROJECTS

### Portfolio Website 📄 | GitHub | *React, Tailwind CSS, Framer Motion, EmailJS*

- Developed a **responsive developer portfolio** using **React**, **Tailwind CSS**, and reusable components to showcase projects, technical skills, and professional achievements.
- Implemented an interactive **EmailJS-powered contact system** and intuitive navigation to provide a seamless user experience without requiring backend services.
- Improved user engagement through **Framer Motion** animations, mobile-first responsive design, and accessibility-focused UI enhancements for consistent cross-device compatibility.
- Deployed the application on **Vercel** and managed the development workflow using **Git** and **GitHub** for efficient version control and continuous updates.

### Bingely 📄 | GitHub | *React, Redux Toolkit, Tailwind CSS, Firebase, TMDB API, Groq AI API*

- Developed an **AI-powered entertainment discovery platform** using **React**, **Redux Toolkit**, and **Tailwind CSS**, implementing reusable components, responsive layouts, and centralized state management.
- Integrated the **TMDB API** and **Groq AI API** to deliver AI-powered media recommendations by converting natural-language queries into personalized movie, TV show, and K-drama suggestions through concurrent API requests.
- Optimized application performance using **lazy loading** with the **Intersection Observer API**, loading movie backdrops only as cards approached the viewport to reduce unnecessary API requests and improve page performance.
- Implemented **Firebase Authentication**, reusable custom hooks, multilingual search, dynamic routing, and URL-based media detail pages to build a scalable and maintainable React application.

### MealBook 📄 | GitHub | *HTML, CSS, JavaScript, Node.js, Express.js, MySQL*

- Developed a **full-stack recipe and meal planning application** using **Node.js**, **Express.js**, and **MySQL**, enabling users to browse, bookmark, and organize recipes with personalized weekly meal plans.
- Integrated the **Edamam REST API** to dynamically retrieve recipe details, including ingredients, cooking time, meal type, and nutritional information through asynchronous API requests.
- Implemented **JWT-based authentication**, protected routes, and user-specific data management to securely handle recipe bookmarking, meal plans, and shopping lists.
- Designed relational database models and backend APIs to support recipe bookmarking, weekly meal planning, and automatic shopping list generation, delivering a scalable and intuitive user experience.

## EXPERIENCE

### Java Internship Trainee

Sep 2019 – Nov 2019

*BELTRON*

- Collaborated with a 3-member team to develop an Examination Management System using **Java** and **SQL**.
- Developed the student module with login, online examinations, admit card generation, and marksheet downloads.
